

IDEAL ENGINEER™

CUSTOM ENCLOSURES AT STANDARD PRICES | 1 OF 3

Fast, easy and convenient.

Custom enclosures in minutes.

Just follow the easy-to-use, step-by-step program at www.IdealEngineer.com and you'll have your custom enclosure in no time. All you have to do is submit your specifications online, and we'll send you a quote within a day! Our advanced software will even create a 3D image of your enclosure as you design it.

Simply visit www.IdealEngineer.com and use our easy-to-follow instructions.

All the options

We make it easy for you to choose exactly what you need. Just go through our list and check off your preferences. If we don't have an option you need, let us know—we can do just about anything. If you need more customization options than listed, check out our fully-custom enclosure options.

Sizes

We can make enclosures as small or big as you need them—even up to 3000 lbs. or 20' x 6' x 8'.

Shapes

Our advanced 3D CAD/CAM software allows precision laser cutting and punching capabilities.

Cutouts

Let us know if you need punching or a cut-out in a door, side or panel. You specify the size you need—on any dimension.

Colors

Any paint color you can think up, we'll go out and find for you. Or choose from our large selection of colors and textures we keep in-house.

Accessories

We'll install anything you need—from studs and nuts to false bottoms and air conditioners.

Standards

You tell us your application, and we'll make an enclosure that meets your ratings requirements. We've already covered the basics—most of our enclosures are UL approved and built to NEMA specifications.
