KanBan Delivery Program.

FOR PARTS OR PRODUCTS.

Orders on demand. Using the KanBan inventory management system, we are able to provide our customers with next day shipment using a pull-from-stock ticket. KanBan is a simple method of overall cost reduction through maintaining inventory in our warehouse. For more information on the KanBan system, see Products and Services.

"Quick Ship" Delivery Program.

FOR CUSTOM ENCLOSURES.

Delivery in two weeks or less. Our comprehensive line of customized standard electrical enclosures is available through our "Quick Ship" delivery program. This includes customization for cut-outs and punching.*

Normal Delivery

IN AS LITTLE AS 2-4 WEEKS.**

We are committed to continuing our tradition of efficient, on-time service. Utilizing our in-house technology and expert staff, we can deliver custom-built sheet metal parts and products in short order, often just weeks. Contact us for information on how quickly we can meet your demands for metal stamping and contract manufacturing.

We'll work with you to determine JIT schedules that meet your needs, whether it's one-time delivery, on-going blanket delivery or emergency projects.

* Subject to terms and conditions.

** Actual delivery time set at time of order.
