

ROHN CUSTOM ENCLOSURES

CREATING PRECISELY WHAT YOU NEED.
PRECISELY WHEN YOU NEED IT.

The best engineering solution for your custom sheet metal products.

Our dedicated team of engineering experts works with you to create designs that are on target in terms of dimensions, deadlines, and budgets. We know how to meet the most stringent customization challenges. Our four generations of experience cutting, bending, welding and finishing metal has allowed us to meet the demands of the most unusual applications.

Technology that works for you.

Our cutting-edge fabrication and engineering equipment allows us to provide you with superior laser, welding, machining, prototyping, painting and assembly capabilities.

TWO CONVENIENT MANUFACTURING CHOICES

NEW! The Ideal Engineer™

CUSTOM ENCLOSURES AT STANDARD PRICES.

Our newly-developed online software allows you to work easily with us to design “modified standard” enclosures. Simply choose from our 21 models and add your own modifications. You’ll even be able to view a 3D model of your enclosure as you design it! Then submit your specifications online and we’ll send you a quote within a day. Visit www.IdealEngineer.com and our easy-to-follow instructions will guide you through the step-by-step program.

Fully-custom enclosures.

A HIGH DEGREE OF CUSTOMIZATION.

If your project requires a great deal of customization, opt for our fully-custom enclosure option. This method is a more time-intensive approach that allows any customization option to be incorporated. We also make other fully-custom fabricated products such as cabinets, control centers, machine bases and shrouds, operator interfaces and stands.

EXCEPTIONAL RESULTS

The highest quality possible.

Every enclosure we make has to meet our creed of quality.

We start with high-quality metal. We precision cut, bend and weld it to meet your requirements. We grind and blend the corners for a smooth, clean “furniture” finish. We then use the finest quality liquid and powder paint available. Nothing leaves our facility until it is quality approved.

Rugged enclosures that’ll stand up to the elements.

Rohn enclosures stand up to the harsh elements of industrial applications. Every enclosure is rigorously monitored throughout the manufacturing process for consistency and quality control. They take on dust, oil, moisture, contaminants and dirt.

Our enclosures are ISO-compliant and meet UL and NEMA requirements.
